## Summary of Experience

- Modernized websites, intranet platforms, and applications to improve usability, structure, and workflows.

- Worked directly with the Customer to understand their pain points which enabled me to build better workflows.

- Created accessible, standards-compliant design systems and user interfaces for public and internal

- Constant contact with the Customer allowed me to verify the work I was doing met their wants & needs.

## Experience and Qualifications

**Dynamo Technologies LLC**     **11/2021 –**

*UI/UX Designer | USGS/USDA/USFS/PC (Contract)*

- Worked directly with the stakeholders at USGS to build an infrastructure and interface for a new application that combines the functionality of multiple outdated applications.

- Created fresh and universally accessible UI using various design systems such as Google Material, USWDS, and Tailwind while following Section 508 accessibility standards.

- Architected a new site structure for the USFS that prioritized critical information and improved usability for everyday users.

**Organized Living**     **05/2020 – 11/2020**

*UI/UX Designer | Internal Design Team*

- Served as the sole UX Designer at Organized Living, translating written concepts and ideas into fully interactive prototypes.

- Created rapid mockups to support and align multiple development teams.

**PROtect**     **08/2019 – 12/2019**

*UI/UX Designer | Internship*

- Worked on the personal safety app PROtect, contributing to core UX activities including storyboarding, wireframing, prototyping, usability testing, and A/B testing.

- Gained hands-on experience across the UX/UI design process, solidifying my interest and leading me to pursue a career in UX/UI design.
